

ECO RAINFOREST CRUISES ACCESS STATEMENT

Byron Eco Cruises & Kayaks departs from the wharf on the river side of the Fishermen's Co-op Building at the Brunswick Heads Boat Harbour.

Car Parking

There is 1 accessible parking space. It is situated on the road side of the Fishermen's Co-op Building. It is a short flat walk of approximately 50m to the wharf.

Drop off Points

If a customer finds it difficult to walk very far they can be driven close to the wharf where cruise staff are on hand to assist them to board the boat. The driver can then park the car. At the end of the cruise the driver could pick the person up from the same place.

Boat Access

Access from the wharf to the boat loading area is via 4 steps. From there access to the boat is via a strong metal gangplank and then down 2 steps onto the boat deck. Once on board the floor is flat and seats are easily accessible. **Cruise staff can assist customers up and down the steps and to board and disembark the boat.** People with walkers can also be assisted.

The other option to board the boat from the wharf is via a special strong gangplank directly from the wharf to the boat. This has been designed to help people with disabilities or elderly or frail people who can't manage the steps.

Unfortunately due to the width of the gangplank on the boat **it is not wheelchair accessible.**

Toilets

There is one wheelchair accessible toilet to the right of the Fishermen's Co-op building from the wharf.
